## PREFACE

What is the procedure to visit any foreign country? How and where can one immigrate and settle abroad? How to procure the passport and visa; the Reserve Bank formalities; Health and other requirements of different countries; the expenses involved, etc.? How long a person can stay in a particular foreign country? What can one bring? The customs baggage rules and duties to be paid?

All the Indian citizens desirous of visiting or settling abroad are confronted with number of such like enquiries the answers for which are not readily available at any one source to ones entire satisfaction. I tried to fill in this vacuum by compiling all needed information in this book. The first edition was published in January this year. The book was very well accepted by the people in travelling trade as well as by the general public. The need was felt to make the information upto date. Hence, this second improved and enlarged edition is in your hand. I hope all citizens of my country will find it useful. Suggestions to improve this book further are most welcome.

My warm thanks to my wife and my daughter who helped me in the arrangement of this book. I owe my thanks to many friends and to the staff of Air India who helped me with all possible information to be included in this book.

Very affectionately I dedicate this book to my friend Mrs. Radha Kakkar, and to all the citizens of India.

A.K. Sahni
