HAY BRADBURY

Who would exchange a good-as-new modern monoplane for an ancient biplane that had been used in the old barnstorming days of flying in the thirties? Richard Bach would.

BIPLANE

is the magnificent account of his first flight with his new acquisition—clean across America from Atlantic to Pacific—a hymn to the great adventure of flight, and much more besides. It is a journey of personal discovery, too, and the excitement of Bach's story, the sheer verve and joy for living he radiates in his solitary encounter with elemental nature, has rarely ever been matched.
