

FIFTH EDITION

CHEMICAL ENGINEERS' HANDBOOK

ROBERT H. PERRY / CECIL H. CHILTON

Index to Sections for Quick Reference

DATA AND FUNDAMENTALS

	Section
Mathematical Tables	1
Mathematics	2
Physical and Chemical Data	3
Reaction Kinetics Reactor Design and Thermodynamics	4

HANDLING OF FLUIDS AND SOLIDS

Fluid and Particle Dynamics	5
Transport and Storage of Fluids	6
Solids Transport and Storage	7
Size Reduction and Size Enlargement	8

HEAT GENERATION AND TRANSFER

Heat Generation, Transport, and Storage	9
Heat Transmission	10
Heat-transfer Equipment	11
Psychrometry, Evaporative Cooling, Air Conditioning, and Refrigeration	12

PRINCIPLES OF DIFFUSIONAL OPERATIONS

Distillation	13
Gas Absorption	14
Liquid Extraction	15
Absorption and Ion Exchange	16
Miscellaneous Separation Processes	17

MULTIPHASE CONTACTING AND SEPARATIONS

Liquid-Gas Systems	18
Liquid-Solid Systems	19
Gas-Solid Systems	20
Liquid-Liquid and Solid-Solid Systems	21

ALLIED AREAS OF ENGINEERING

Process Control	22
Materials of Construction	23
Process Machinery Drives	24
Cost and Profitability Estimation	25

Contents

For the detailed contents of any section, consult the title page of that section.
See also the alphabetical index in the back of this handbook.

	Section
Mathematical Tables Cecil H. Chilton	1
Mathematics Arthur E. Hoert	2
Physical and Chemical Data Peter E. Liley, W. R. Gambill	3
Reaction Kinetics, Reactor Design, and Thermodynamics Kuang-Hui Lin, H. C. Van Ness	4
Fluid and Particle Dynamics D. F. Boucher	5
Transport and Storage of Fluids R. P. Genereaux	6
Solids Transport and Storage Grantges J. Raymus	7
Size Reduction and Size Enlargement Richard H. Snow	8
Heat Generation, Transport, and Storage William T. Reid	9
Heat Transmission James G. Knudsen	10
Heat-transfer Equipment Frank L. Rubin	11
Psychrometry, Evaporative Cooling, Air Conditioning, and Refrigeration Frank H. Fuller	12
Distillation Buford D. Smith	13
Gas Absorption Robert N. Maddox	14
Liquid Extraction Robert E. Treybal	15
Adsorption and Ion Exchange Theodore Vermeulen	16
Miscellaneous Separation Processes, J. D. Henry, Jr.	17
Liquid-Gas Systems James R. Fair	18
Liquid-Solid Systems Shelby A. Miller	19
Gas-Solid Systems H. T. Porter	20
Liquid-Liquid and Solid-Solid Systems William M. Goldberg	21
Process Control J. C. Wherry	22
Materials of Construction Robert B. Narden	23
Process Machinery Drives Frank L. Evans	24
Cost and Profitability Estimation James B. Weaver	25

Index follows Section 25.

Other Important Facts in This Field

As always, the indispensable one-volume source of factual information to save both professional and student chemists valuable work hours, simplify research, and reduce chance of mistakes—now in a new edition!

Instant factual data for solving numerical problems . . . for estimating the probability that a postulated reaction will take place . . . for determining the best sets of conditions for analysis and synthesis . . . for finding "official" symbols and abbreviations in seconds . . . for converting units from one to another, including SI units . . . and much, much more—are contained in sections covering:

• mathematics • general information and conversion tables • atomic and molecular structure • inorganic chemistry • analytical chemistry • electrochemistry • organic chemistry • spectroscopy • thermodynamic properties • physical properties • and a miscellaneous section presenting information ranging from the thermoelectric values of various thermocouples to the Joule-Thompson coefficient for real gases.

Brand-new material, expanded areas, updated chapters—all reflect advances and important modern phenomena.

LANGE'S HANDBOOK OF CHEMISTRY, 12th Edition

Edited by JOHN A. DEAN

Professor of Chemistry, University of Tennessee

1,488 pp., illus.

Complete and current, this edition of the best-selling Handbook provides—in one handy, easy-access volume—an up-to-date source of the formulas, equations, methods, technologies, and principles needed to perform just about any conceivable laboratory operation. It features a great deal of new material—more than 90 percent of the original edition has been revised and expanded—plus new techniques, detailed explanations and diagrams, and step-by-step guidelines.

CHEMICAL TECHNICIANS' READY REFERENCE HANDBOOK, 2nd Edition

Edited by GERSHON J. SHUGAR, Essex County College,

New Jersey; RONALD A. SHUGAR, Medical Associates, Edison,

New Jersey; LAWRENCE BAUMAN, Former Associate

Professor, New York University School of Dentistry; and

ROSE SHUGAR BAUMAN, Science Writer

800 pp., 710 illus.
