8	$E = mc^2$	98
	Bibliography	115
	Index	122

"The interrelationship between pure science and invention is fascinatingly explored in this book... The author describes and explains scientific discovery, and at the same time gives us a glimpse into the lives and personalities of these famous men and women...."

—*Saturday Review*

"The interest of the author in his subject, his ability to explain technical and theoretical material with just the right amount of detail to clarify and fascinate, and his unity of purpose combine to produce an exceptionally readable book...."

—*Library Journal*

"Gives a good insight into the struggles and triumphs of some of the great minds of the last centuries."

—*Oakland Tribune*
