

I. I. Artobolevsky

MECHANISMS
in Modern
Engineering
Design

Volume

III

MIR PUBLISHERS MOSCOW

"Have you ever wished for a book arranged for a designer trying out new ideas, or looking for a mechanism that will perform a certain function in a certain desired way? It should be chiefly a collector, of course, but then this must include some scheme for classification—a very difficult thing to accomplish. This is such a book. It represents a very important effort by the late great authority on mechanisms, Ivan Ivanovich Artobolevsky, to assemble and publish a huge collection of different mechanisms, presenting them systematically in as concise a form and as useful as possible a manner for the benefit of machine designers and inventors. . . . It represents years of devoted preparation. We await the examining these volumes with keen anticipation of a treasure trove".

A Review of Vols. 1, 2 (Part 1) and
2 (Part 2) from *Mechanism and Modern
Technology*, 1970.
