PREFACE

To the Youth of India is a collection of some of the stirring and inspiring lectures that the Swami Vivekananda delivered to vast audiences in India and Ceylon after his rise to fame of the patriot-saint of Modern India. The object of this publication is to bring within the reach of our student population a small, cheaply-priced, and yet representative selection of the great Swami's message to the young sons and daughters of India. Political partition has not affected in the least the value of Swami Vivekananda's teachings in the solution of the great problems of this vast sub-continent. The great Swami was no narrow sectarian and his teachings will appeal equally to all persons who value Truth for its own sake, irrespective of their religious denominations.
