UNDERSTAND THE WORLD YOU LIVE IN!

Do you ever have the urge to visit foreign places—to see the exotic countries talked about in the newspaper headlines? Take this brush-up course in geography and it will be like visiting any land you like: Brazil • Egypt • France • India • even the island of Zanzibar off the coast of Tanganyika. You can find out how other people live and what their countries look like—just by relaxing in your own living room.

This simplified guide to the science of geography has been expressly prepared for easy self-study. Using a new concept in geography it gives you the overall political, physical, and economic make-up of a complete region and then analyzes that region's countries in detail. Maps, charts, and line drawings explain relationships between nations. Self-test quizzes help you keep track of your progress. Also included are an index and handy reference list of facts for quick review.

TAKE A TRIP AROUND THE WORLD IN YOUR EASY CHAIR!
