**"THE SUM TOTAL OF WHAT A MAN KNOWS IS VANISHINGLY SMALL. WHAT SEEMS IN THE END MORE IMPORTANT IS THAT ONE SHOULD PURSUE KNOWLEDGE."** —*Bertrand Russell*

No man has had a more widespread influence on the intellectual life of the Twentieth Century than Nobel Prize-winner Bertrand Russell. Gifted with profound insight and a superb literary style, the eminent scientist-philosopher is a social critic of formidable wit and power.

In this illuminating volume he presents more than a mere survey of philosophy. This is a vivid human portrait of the men who have shaped the western mind, and a challenging exploration of the ideas which have inspired man's historic search for himself in the world he has created.

**"One is hard put to find another major philosophical writer who speaks with such clarity, wit and brilliance."** —*Chicago Sun Times*
