

A TEXT BOOK OF
APPLIED
MECHANICS

(Engineering Mechanics)

S. RAMAMRUTHAM

DHANPATRAI & SONS

CONTENTS

Chapter

Pages

PART ONE - STATICS

1. Composition and Resolution of Forces

Introduction - Resultant of Two forces which are not Parallel - Resolution of a single force into components - A general graphical Method of determining the resultant of a system of coplanar forces - Principle of triangle of forces - Lami's theorem - Solved Problems 1 - 34. Problems for exercise.

1 - 55

2. Friction

Frictional Resistance - Angle of friction - Angle of Repose - Laws of friction - Cone of friction - Equilibrium of a body on a rough inclined plane - Solved Problems 35 - 82. Problems for exercise.

56 - 116

3. Centre of Gravity and Moment of Inertia

Centre of gravity - Definition - Lamina - Moment of an area - Centroid of a uniform lamina - Centroids of laminae of various shapes : Triangle, Circle, Semi-circle, trapezium Built up section - Analytical and graphical methods - Moment of Inertia of a lamina - Definition - Parallel axes theorem - Perpendicular axes theorem - Moments of Inertia of laminae of different shapes - Rectangular, circular, triangular and composite sections - Solved problems 83 to 103. Problems for exercise.

117 - 155

4. Lifting Machines

Definition of Machine - Ideal Machine - Practical Machine - The Law of Machine - Reversibility of a Machine - The Simple Pulley - First order or system of Pulleys - Pulleys of second order or system - Pulleys of third order or system - Wheel and axle - Wheel and differential axle - Differential Pulley or Weston Pulley block - Screw thread - Screw Jack - Max. Efficiency condition for a screw Jack - Differential screw jack - Worm gearing - Purchase crab Winches - Idle wheel - Trains of Wheels - Solved Problems 104 - 128. Problems for exercise.

156 - 199

5. Analysis of Framed Structures

Perfect frame - Deficient frame - Redundant frame - Reactions at Supports - Analysis of a truss - Method
