ELECTRICAL

ENGINEERING &

ELECTRONICS

BY B. R. SHARMA

ELEMENTS OF ELECTRICAL ENGINEERING AND ELECTRONICS

[In SI (International System) Units]

[Strictly according to New Scheme for AMIE Section A

Examination effective from May 1974

and other Engineering examinations]

By

B.R. SHARMA

Author of :

Electrical Machines,

Electrical Engineering Design, and

Electrical Engineering Materials

(for AMIE Sec B)

New Scheme effective from May 1974

1977

SATYA PRAKASHAN

CONTENTS

<i>Chap.</i>	<i>Pages</i>
<p>1. Ohm's Law ...</p> <p>Structure of Matter—The Electric Current—E.M.F. and Current—Electronic and Conventional Current and Current Strength—Electromotive Force (E.M.F.)—Electric Field—Potential Difference between Two Point—Electric Circuits—Resistance and Unit of Resistance—Ohm (Ω) Conductance (G)—Factors Governing Resistance of Conductor—Specific Resistance of a Conductor—Specific Resistance or Resistivity (ρ)—Ohm's Law—Combination of Resistance—Numerical Exercises Theory Questions Revision Formulae.</p>	<p>1—19</p>
<p>2. Temperature Co-efficient of Resistance ...</p> <p>Change of Resistance with Temperature—Effect of Temperature on Resistance of Various Types of Materials—Effect of Heat on Resistance (Mathematical Treatment)—Temperature Co-efficient of Resistance at 0°C—Relation between α_0 and α_1—Effect of Temperature on Resistivity—Numerical Exercises Theory Questions Revision Formulae.</p>	<p>20—29</p>
<p>3. Kirchhoff's Laws and Network Theorems ...</p> <p>Kirchhoff's Laws—Determination of Sign—The Balanced Wheatstone Bridge—Definitions of Important Terms—Network Theorems—Superposition Theorem—Thevenin's Theorem—Three Terminal Networks and Star-Delta Transformation—Delta-Star Transformation—Star-Delta Transformation—Numerical Exercises.</p>	<p>30—63</p>
<p>4. Work, Power and Energy ...</p> <p>Units—Force and its Units—Work and Units of Work—Various Heat Units—Heating Effects of Currents (Joule's Law)—Experimental Verification of Joule's Law—Efficiency—Thermal Efficiency—Power and its Units—Energy—Numerical Exercises—Theory Questions.</p>	<p>64—77</p>
<p>5. Electrostatics ...</p> <p>Electrostatics—Electric Charges—Electrostatic Induction—Laws of Electrostatics—Mathemati-</p>	<p>78—94</p>
