Men who Changed the World

Here are the fascinating stories of twelve men whose individual inventive genius for outstanding discovery has changed the way we live during the last seventy years. The twelve include such familiar names as Bell, Edison, Marconi, Ford, Baird and Whittle. In each case the author explains the chief technical facts of the discovery or invention, but he also makes a point of telling the story of the inventor's boyhood and young manhood and how he grew from ordinary-seeming youth to brilliant, fulfilled manhood.

The **ENGLISH LANGUAGE BOOK SOCIETY**, in addition to its low-priced editions of specialist works, publishes a variety of new series for the non-specialist.

Each volume has been selected for its high standard of accuracy and usefulness or interest, and is now available at a lower price than ever before.

If you would like to see other titles added to this 'Science Today' Series or are interested in other subjects, send your suggestions and inquiries to:

*The English Language Book Society,
Box 295, Wimpole Street,
London, W.1.*

All Books published by the Society carry this label—and the name of the appropriate series:
