**AUDELS
NEW ELECTRIC LIBRARY**

- Vol. 1—Principles of electricity, magnetism, armature winding, repairs.
- Vol. 2—Dynamoes, motors, their construction, installation, maintenance, trouble shooting.
- Vol. 3—Testing instruments, tests, storage batteries.
- Vol. 4—A.C. principles, diagrams, power factor, alternators, transformers.
- Vol. 5—A.C. motors, windings, maintenance, converters, switches, fuses, circuit breakers.
- Vol. 6—Relays, condensers, regulators, rectifiers, meters, switchboards, power station practice.
- Vol. 7—Wiring, circuits, H.T. distribution, calculations, code, marine wiring practice.
- Vol. 8—Railways, signals, elevators.
- Vol. 9—Radio, telephone, telegraph, television, motion pictures.
- Vol. 10—Refrigeration, illumination, welding, x-ray, modern electrical appliances.
